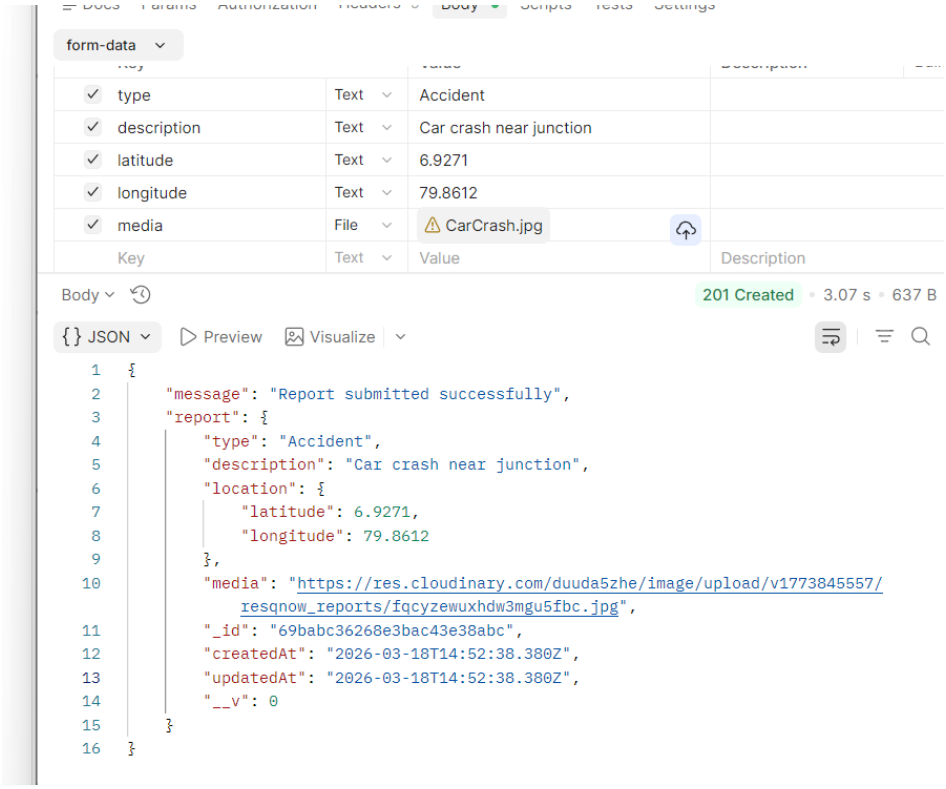
File Upload Testing

File upload functionality was tested using Postman.
Valid image files were successfully uploaded and stored in Cloudinary, and the returned URL was saved in the report document.



Files exceeding the 2MB limit were also rejected.

```
MulterError: File too large
    at abortWithCode (D:\Capstone Project\ResQnow\ResQNow-Crowdsourced_Location_Aware_Emergency_Respons
    at FileStream.<anonymous> (D:\Capstone Project\ResQnow\ResQNow-Crowdsourced_Location_Aware_Emergenc
    at FileStream.emit (node:events:524:28)
    at SBMH.ssCb [as _cb] (D:\Capstone Project\ResQnow\ResQNow-Crowdsourced_Location_Aware_Emergency_Re
    at feed (D:\Capstone Project\ResQnow\ResQNow-Crowdsourced_Location_Aware_Emergency_Response_System\
    at SBMH.push (D:\Capstone Project\ResQnow\ResQNow-Crowdsourced_Location_Aware_Emergency_Response_Sy
    at Multipart._write (D:\Capstone Project\ResQnow\ResQNow-Crowdsourced_Location_Aware_Emergency_Resp
    at writeOrBuffer (node:internal/streams/writable:572:12)
    at _write (node:internal/streams/writable:501:10)
    at Writable.write (node:internal/streams/writable:510:10)
```

Additionally, the system handled cases with no file upload by storing a null value.

form-data

        "__v": 0
    }
}
```

File type validation was tested by uploading both valid (JPG, PNG) and invalid (PDF, TXT) files. Valid files were accepted, while invalid files were rejected with an error message, ensuring proper validation.

These tests confirmed that file validation, size limits, and media linking work correctly.
